Friday 16th June (9:15am) – Room 2 Assembly
30th June – Term 2 finishes
17th July – Pupil Free Day
18th July- Students commence Term 3

Welcome Back

It was lovely to see all the happy, smiling faces back at school this morning. Staff have lots of exciting activities planned for the students and we look forward to sharing photos of them in future newsletters.

Creaney ESC Visioning session

All parents are reminded about the Visioning session this Friday morning (9:15 am). Everyone is welcome to this workshop which will focus on establishing our school vision and our shared values. This is your opportunity to have input into our Business Planning.

Assemblies

The first assembly of 2017 will be hosted by C2 on Friday 12th May at 9:15 am in Room 5. Our Senior Mentors will be presented with their badges on this day. Families and friends are always welcome.

School Photos

Students will be bringing home their Kapture Photography order envelope this week. School Photos will be taken on the 10th May. Kapture recommends ordering online through the website printed on the envelope as payment is secure and can be immediately verified. Alternatively you can pay by cash and return the envelope to school on photo day. Kapture offer a money back guarantee for any parent who is not fully satisfied with their photo package.

Whooping Cough

The Health Department has notified us of a number of cases of whooping cough in metropolitan schools and has asked us to remind parents to be vigilant about recognising the signs and symptoms of this highly infectious illness. Whooping cough usually starts like a cold with a blocked or runny nose, tiredness, mild fever and cough. The cough typically gets worse and can be worse at night. However, not all coughs show the 'whooping sound'. After five days of antibiotic treatment, people are normally no longer infectious, however, the cough often continues for many weeks. Vaccination is the best way to prevent whooping cough and the health department recommends booster shots for adults and older children. Booster shots can be given from 3.5 years of age.

Kind regards,

Cat Marcoolyn
